

## Further Reading

There are many valuable references within each of the *Hadoop Administration Modules*. Below is a selection of readings and references which will help to shape the approach taken in developing this resource. Some of these are available on PDF or are linked to websites.

### 1. More Details on Configuration Files :

<http://hadoop.apache.org/docs/r1.1.2/core-default.html>

This link provides you the detailed description of the parameters used in core-site.xml

<http://hadoop.apache.org/docs/r1.1.2/mapred-default.html>

This link provides you the detailed description of the parameters used in hdfs-site.xml

<http://hadoop.apache.org/docs/r1.1.2/hdfs-default.html>

This link provides you the detailed description of the parameters used in mapred-site.xml

### 2. Hadoop Cluster Setup :

[http://hadoop.apache.org/docs/r0.19.1/cluster\\_setup.html](http://hadoop.apache.org/docs/r0.19.1/cluster_setup.html)

This link leads to the document that describes how to install, configure and manage non-trivial Hadoop clusters ranging from a few nodes to extremely large clusters with thousands of nodes.

### 3. Hadoop on Amazon AWS EC2 :

<http://www.edureka.in/blog/install-apache-hadoop-cluster/>

This link provides you step by step guide to install Apache Hadoop Cluster on Amazon EC2 on Ubuntu

### 4. Hadoop Cluster Configuration:

<http://www.edureka.in/blog/hadoop-cluster-configuration-files/>

This link provides you information about configuration file names and its usage
