Module 4 – Backup, Recovery and Maintenance

Assignment

Table of Contents

edureka!

1. Task 1

Do a graceful Addition and Removal of a Data node from the Cluster.

2. Task 2

How can you control jobs that are not submitted to a particular task tracker, but that node is used only as a DataNode?

3. Task 3

Bring a new NameNode up, without using data from secondary NameNode. You should not execute the NameNode -format command again.
